Alexsandro Joaquim De Matos

Junior Full Stack Developer in e-commerce and automation

Process Analyst · Sombrio, Brazil · open to remote work

alexmatos0620@gmail.com (48) 99863-8225 linkedin.com/in/alexsandrojoaquim github.com/alexmatosz

Summary

I turn manual e-commerce processes into AI-powered automated systems, so businesses sell more and operate with less effort. I know marketplace operations from the inside (Mercado Livre, Shopee, Amazon, TikTok Shop, Magalu) and build the tools that make them faster, with Python, official APIs and AI.

Experience

E-commerce Analyst and Consultant, Monvatti

Apr 2026 — present

E-commerce consultancy

- I run operations and growth for clients on Mercado Livre and Shopee.
- I started Monvatti's official partnership with Bling (ERP) and lead the project. It brought in new contracts and opens the door to supporting other ERPs.
- I build internal process automation tools, such as Replique.

E-commerce Operator, Footwear manufacturer

Jun 2025 — Mar 2026

A leading footwear company in Sombrio, Brazil

- Implemented Bling (ERP) in an operation that sold only on Mercado Livre and expanded it to Shopee, Amazon, TikTok Shop and Magalu at the same time, increasing revenue.
- Connected Google Sheets to Bling to update stock automatically.
- Designed the process so the whole team could use it without changing how they worked, which made adoption easy.

Projects

Replique: AI-powered multi-marketplace platform in development

SaaS for e-commerce agencies: it finds the best-selling listings on Mercado Livre, Shopee and Amazon, and lets you copy, edit and publish them to up to three marketplaces at once through their APIs.

- Multi-client and multi-agency, with isolated data, team permissions and an audit log.
- "Improve with AI" rewrites titles and descriptions with Claude, and the whole operation can run by chat through an MCP server.
- Modules for finance and margins, account health, buyer questions, fulfillment stock, taxes and bulk publishing.
- Encrypted credentials and automated tests with pytest.

Stack: Python, FastAPI, SQLAlchemy, Mercado Livre API, Shopee Open Platform, Amazon SP-API, Anthropic API, MCP

Listing Agent: Mercado Livre

Reads a product spreadsheet and creates and publishes listings through the official Mercado Livre API: it finds the category, fills in the required attributes, follows the title rules and uses AI for title and description, with a fallback template if the AI fails. Includes a web form to build the spreadsheet without mistakes.

Stack: Python, OAuth2, Mercado Livre API, Claude API, HTML/JS

Ferro & Navalha: Barbershop website

Responsive landing page with SEO (schema.org and Open Graph) and direct conversion through WhatsApp.

Stack: HTML, CSS, JavaScript

Skills

Development: Python, FastAPI, SQLAlchemy, SQL, HTML, CSS, JavaScript, REST APIs, OAuth2, Git

AI and automation: Claude API, MCP (Model Context Protocol), AI agents

E-commerce: Mercado Livre, Shopee, Amazon, TikTok Shop, Magalu, Bling (ERP)

Tools: Advanced Excel, Google Sheets

Processes: Process mapping and improvement, Systems implementation

Education

Software Engineering, SATC, Criciúma

In progress, expected 2028

Web Development Technician, integrated with High School, Instituto Federal Catarinense (IFC), Sombrio Campus

Completed in 2024

Portuguese (native) · English (intermediate)
